

USM Researchers Investigate Collaborations in Canada

As part of the NSF EPSCoR International Exchange Program, Dr. Nan Wang of the University of Southern Mississippi and her student Ying Li visited with researchers at Simon Fraser University on March 14-19, 2010. Dr. Wang presented a summary of their EPSCoR supported research to Dr. Ke Wang and Dr. Martin Ester in the Department of Computing and to Dr. Jack Chen in the Department of Molecular Biology and Biochemistry. They discussed adapting some of Dr. Ester's classification methods to one of their research problems and explored potential collaborations in the areas of data mining and bioinformatics.
